Research Interest

My research interest lies in multimodal generative models as a means to build faithful world representations. Through RL, distillation, and agent frameworks, I have contributed to audio-visual generation, autonomous driving, and video understanding. Going forward, I aim to advance multimodal foundation models with principled theoretical insights.

Education

Fudan University Shanghai, China
B.S. in Computer Science *Sep. 2023 – Jun. 2027*

- GPA 3.84/4.00, Rank 4/92. Advised by **Prof. Wenchao Ding** on autonomous driving risk assessment.

University of North Carolina at Chapel Hill Chapel Hill, NC
Exchange Student *Aug. 2025 – Dec. 2025*

- Dean's List. Researched VLA models and LLM agents under the supervision of **Prof. Huaxiu Yao**.

Representative Honors

Tencent Outstanding Student Award Sep. 2025
Fudan University Outstanding Student Award (Top 8%) Oct. 2024
Fudan University LLM4EDA Summer School, Outstanding Student Jul. 2024
Fudan–Tongji Joint CTF Competition, First Prize Apr. 2024

Internship Experience

JD Explore Academy Dec. 2025 – Present
Intern, Multimodal Foundation Model Research Department

- Researching streaming audio-visual generation, DMD distillation algorithms, and world models with world model memory. Supervised by **Zeyue Xue**.

Publications

OmniForcing: Unleashing Real-time Joint Audio-Visual Generation Under Review
Yaofeng Su*, Yuming Li*, Zeyue Xue, Jie Huang, Siming Fu, Haoran Li, Ying Li, Zezhong Qian, Haoyang Huang, Nan Duan

- Proposed a framework to distill offline bidirectional audio-visual diffusion models into real-time streaming autoregressive generators.

SimpleMem: Efficient Lifelong Memory for LLM Agents Under Review
Jiaqi Liu*, Yaofeng Su*, Peng Xia, Siwei Han, Zeyu Zheng, Cihang Xie, Mingyu Ding, Huaxiu Yao

- Proposed an efficient lifelong memory system for LLM agents that reduces redundancy and token costs while maintaining long-term interaction quality.

Learning a Unified Risk Map for Autonomous Driving in Partially Observable Environments IEEE RA-L 2026
Jie Jia*, Yaofeng Su*, Zeyu Bao, Yun Hong, Bingzhao Gao, Zhongxue Gan, Wenchao Ding

- Proposed a unified risk map representation for occlusion-aware prediction in partially observable driving environments.

ReAgent-V: A Reward-Driven Multi-Agent Framework for Video Understanding NeurIPS 2025
Yiyang Zhou*, Yangfan He*, Yaofeng Su, Siwei Han, Joel Jang, Gedas Bertasius, Mohit Bansal, Huaxiu Yao

- Proposed a reward-driven multi-agent framework that enables dynamic feedback and self-correction for video understanding.

JoyAI-Image: Awakening Spatial Intelligence in Unified Multimodal Understanding and Generation Tech Report
JD Explore Academy (contribution during internship)

- A unified multimodal model awakening spatial intelligence for image understanding and generation.

Skills

Programming: Python, C/C++, PyTorch, Triton, Linux, Git, Docker | **Languages**: English (TOEFL 108)
AI: RL Theory, Diffusion Models and SDE, LLM/VLM Distillation, Distributed Training, AI Agent, Algorithm Analysis
