Research Interests

My undergraduate research has centered on building faithful representations of the world with multimodal generative models. Through diffusion distillation, reinforcement learning, and structured memory and agent harnesses, my work across streaming audio-visual synthesis, risk-aware scene modeling, and lifelong memory has laid the groundwork for real-time multimodal interaction. Going forward, I aim to develop expressive, full-duplex interactive multimodal models and inference-time reasoning techniques during live interaction, while advancing physical fidelity and long-horizon consistency to support real-world task planning.

Education

Fudan University Shanghai, China
B.S. in Computer Science and Technology *Sep. 2023 – Jul. 2027 (Expected)*

- GPA: 3.84/4.00 (Rank 7/98). Advised by **Prof. Wenchao Ding** on autonomous driving risk assessment.

The University of North Carolina at Chapel Hill Chapel Hill, NC, USA
Visiting Exchange Student in Computer Science *Aug. 2025 – Dec. 2025*

- GPA: 3.58/4.00, Dean's List. Researched VLA models and LLM agents with **Prof. Huaxiu Yao**.

Peer-Reviewed Publications (* indicates equal contribution)

OmniForcing: Unleashing Real-time Joint Audio-Visual Generation ECCV 2026, **Long Oral**
Yaofeng Su*, Yuming Li*, Zeyue Xue, Jie Huang, Siming Fu, Haoran Li, Haoyang Huang, Nan Duan
Selected as one of 28 Long Oral presentations out of 10,473 submissions (∼0.27%).

SimpleMem: Efficient Lifelong Memory for LLM Agents ICML 2026
Jiaqi Liu*, Yaofeng Su*, Peng Xia, Siwei Han, Zeyu Zheng, Cihang Xie, Mingyu Ding, Huaxiu Yao

Learning a Unified Risk Map for Autonomous Driving in Partially Observable Environments IEEE RA-L 2026
Jie Jia*, Yaofeng Su*, Zeyu Bao, Yun Hong, Bingzhao Gao, Zhongxue Gan, Wenchao Ding

ReAgent-V: A Reward-Driven Multi-Agent Framework for Video Understanding NeurIPS 2025
Yiyang Zhou*, Yangfan He*, Yaofeng Su, Siwei Han, Joel Jang, Gedas Bertasius, Mohit Bansal, Huaxiu Yao

Research Experience

Tencent Oct. 2026 – Present
Research Intern, Multimodal Generative Models (Tencent Qingyun Program)

- Selected into the **Tencent Qingyun Program**—Tencent's flagship, top-tier-compensated AI research internship for standout Ph.D./M.S. candidates and exceptional undergraduates—to develop architectures and algorithms for full-duplex real-time interactive generation, dynamic world-state evolution, and long-horizon persistence.

Joy Future Academy, JD.com Dec. 2025 – Oct. 2026
Research Intern, Multimodal Foundation Model Research Department *Mentor: **Zeyue Xue***

- Researched real-time streaming multimodal diffusion, distribution matching distillation (DMD), and action-conditioned audio-visual world models with camera-trajectory control and long self-rollout training.
- **OmniForcing (ECCV 2026 Long Oral):** Co-led (listed first) the distillation of offline bidirectional audio-visual diffusion models into streaming generators (0.71 s first-chunk latency, ∼25 FPS on a single GPU); proposed physical-time asymmetric block-causal alignment with a global prefix and identity-RoPE audio sink tokens, alongside a three-stage joint Self-Forcing distillation recipe.
- **JoyAI-Echo (Tech Report, 2026):** Built upon my OmniForcing framework to develop audio-visual DMD distillation for minute-level multi-shot generation, stabilizing training via CFG rescaling and an audio adversarial discriminator to achieve a 7.5× inference speedup.

The University of North Carolina at Chapel Hill Aug. 2025 – Dec. 2025
Research Intern, Department of Computer Science *Advisor:* ***Prof. Huaxiu Yao***

- Researched lifelong memory architectures for long-horizon LLM agents and reward-guided post-training for robotic vision-language-action (VLA) policies.
- **SimpleMem (ICML 2026):** Originated and co-led a lifelong memory framework combining write-time semantic structured compression, recursive memory consolidation, and intent-aware hybrid retrieval, improving average F1 by 26.4% on LoCoMo while reducing inference token consumption by up to 30×.
- **ReAgent-V (NeurIPS 2025):** Adapted and debugged the SimplerEnv benchmark and reformulated VLA post-training from sequence-level to action-chunk-level optimization with video-understanding rewards, outperforming RL baselines by 9.8% on VLA alignment.

Fudan University Oct. 2024 – Sep. 2025
Research Intern, College of Intelligent Robotics and Advanced Manufacturing *Advisor:* ***Prof. Wenchao Ding***

- Researched diffusion-based safety-critical traffic scenario synthesis and spatio-temporal risk modeling for autonomous driving in partially observable environments.
- **Unified Risk Map (IEEE RA-L 2026):** Co-led the framework on the Waymo Open Motion Dataset; proposed off-road and adversarially guided diffusion denoising to synthesize realistic occluded interactions, designed a lightweight spatio-temporal risk prediction network, and led manuscript drafting and peer-review revisions.

Honors and Awards

Selected for ECCV 2026 Long Oral Presentation (28 of 10,473 submissions, ∼0.27%)	Aug. 2026
Dean's List, The University of North Carolina at Chapel Hill	Dec. 2025
Tencent Rhino-Bird Open-Source Talent Program Outstanding Student Award (41 of 2,300+)	Sep. 2025
Fudan University Outstanding Student Award (Top 8%)	Oct. 2024
First Prize & First-Year Student First Prize, Inaugural Fudan–Tongji CTF Competition	Apr. 2024

Talks and Presentations

ECCV 2026 Long Oral Presentation Sep. 2026
Oral Presenter, European Conference on Computer Vision (ECCV) *Malmö, Sweden*

- Presented *OmniForcing: Unleashing Real-time Joint Audio-Visual Generation* in the main conference oral session.

Invited Talk, Lightricks (LTX-Video Team) May 2026
Invited Speaker, Lightricks Research

- Presented *OmniForcing* (real-time streaming joint audio-visual generation built on LTX-2) to Lightricks' CTO and Director of GenAI Research.

Academic Service

Reviewer, IEEE International Conference on Robotics and Automation (ICRA)	2027
Reviewer, COLM Workshop on Lifelong Agents: Learning, Aligning, and Evolving (LLA)	2026
Reviewer, ICLR Workshop on Lifelong Agents: Learning, Aligning, Evolving (LLA)	2026

Skills

Programming & Systems: Python, C/C++, PyTorch, Triton, Distributed Training, Linux, Git, Docker
Languages: Chinese (Mandarin, native); English (fluent, TOEFL iBT 108: R 30, L 28, S 23, W 27)
Research Areas: Diffusion & Flow Models, Model Distillation, Reinforcement Learning, World Models, Multimodal Agents
